# VOLCLAY KWK Krystal Klear

## **GENERAL DESCRIPTION:**

VOLCLAY KWK Krystal Klear is a fine granular sodium bentonite that allows for superior absorption and clarifying characteristics.

## **APPLICATIONS:**

- ◆ Wine: Clarification
- ◆ Juice: Clarifying agent
- ◆ Efficiently removes suspended colloidal particles
- ◆ Prevents cloudiness while removing heat-sensitive proteins

## **PHYSICAL PROPERTIES:**

- ◆ Appearance: Granular
- ◆ Color: Clay
- ◆ Odor: Odorless
- ◆ pH @ 5% solids: 8.5-10.5

## **STORAGE & HANDLING**

**Handling and Storage:** Do not breathe dust. Use normal precautions against bag breakage or spills of bulk material. Avoid creation of respirable dust. Use good housekeeping in storage and use areas to prevent accumulation of dust in work areas. Use adequate ventilation and dust collection. Maintain and use proper, clean respiratory equipment. Launder clothing that has become dusty. Empty containers (bags, bulk containers, storage tanks, etc.) retain silica residue and must be handled in accordance with provisions of this Material Safety Data Sheet. Warn and Train employees in accordance with state and federal regulations.
