## CRIMSON NaK CIP

### **GENERAL DESCRIPTION:**

Crimson NaK CIP is a liquid blend of sodium hydroxide and potassium hydroxide that is designed to raise pH or increase the alkalinity of a solution. This product is suitable across a variety of industries, where applications call for the neutralization of acids, or a requirement of a stand-alone cleaner.

### **BENEFITS:**

- ◆ Eliminates formation of sludge
- ◆ Effective CIP cleaner
- ◆ Easily mixed within solutions

### **PHYSICAL PROPERTIES:**

- ◆ Appearance: Clear
- ◆ Odor: Mild
- ◆ pH: 12-14
- ◆ Solubility: Complete

### **DIRECTIONS FOR USE:**

Crimson NaK CIP is more dense and viscous than water and a majority of other solutions, and therefore should be added as directed to ensure proper mixing. Usage rates are related to the type of application and the desired pH. This product is designed to be applied through the use of a serviceable pump. DO NOT ADD WATER TO CRIMSON NaK CIP. If a dilution is required, always add this product to cold water.

### **SAFETY:**

**STORAGE:** Crimson NaK CIP should be stored in cool, dry areas where it will be not be exposed to extreme weather. To avoid contamination, empty containers of the product should not be reused.

**FIRST AID:** For contact with skin & eyes, flush thoroughly with cool running water. For eyes, flush for at least 15 minutes and seek medical attention. If swallowed, do not induce vomiting. Drink large amounts of milk or water. Call a physician.
