Potassium Sorbate FCC

GENERAL DESCRIPTION:

Potassium Sorbate is the potassium salt within Sorbic Acid. It is a naturally occurring organic acid that is used throughout a variety of industries. Potassium Sorbate is a white to slightly yellow crystalline powder with no flavor. This product is more soluble in water than acid.

APPLICATIONS:

- ◆ Mold & Yeast inhibitor
- ◆ Food preparation
- ◆ Dietary supplement usage
- ◆ Wine stabilizer
- ◆ Personal care & hygiene products

PHYSICAL PROPERTIES:

- ◆ Appearance: Solid
- ◆ Color: White
- ◆ Odor: slightly pungent
- ◆ pH: 8-11 @ 20°C

STORAGE & HANDLING:

Store in well-closed containers in a cool, dark place.
