Trisodium Phosphate, Anhydrous

GENERAL DESCRIPTION:

Trisodium Phosphate is a white, granular material that is soluble in water and produces strong alkaline solutions.

APPLICATIONS:

- ◆ Cleaning compounds: An ingredient in household and heavy duty industrial cleaners, such as floor and wall cleaners.
- ◆ Water treatment: Softens water by precipitation, provides an alkalinity buffer for boiler waters.
- ◆ Textile: TSP can be used for the scouring of wool.

PHYSICAL PROPERTIES:

- ◆ Appearance: Granular
- ◆ Color: White/Off White
- ◆ Odor: Odorless
- ◆ pH at 1% of weight: 11.5
- ◆ Water Solubility: soluble

HANDLING & STORAGE:

This product should be handled with caution. Wash thoroughly after each use. Store in a tightly closed container in a cool, dry, and well-ventilated area. Avoid contact with eyes, skin, and clothing.
